

OUR OFFERINGS

Speedy Installations

All our Home Lifts can be installed within 2 days.

No Shaft Required

The Home Lift's unique rail support means there is no need to build an expensive and messy shaft.

Retro-fit

Due to their design and simplicity of installation, our Home Lifts can be installed after the house has been built.

Size

Duo Home Lift has a tiny footprint of just 0.8 square metres (carrying capacity of 170 kgs) while Trio is only 1.3 square metres (carrying capacity of 250 kgs).

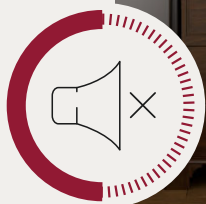

Power Requirements

Our Home Lifts operate by way of a normal 220V plug and there is no need for 3-phase power.

Silence in Action

Our Home Lifts do not make use of noisy hydraulics or external mechanisms and due to their unique drive system, they have an audible noise level of fewer than 48 decibels.

SAFETY FEATURES

Obstruction Sensor

All our Home Lifts are installed with safety sensors above (roof) and below (floor) of the lift car that will stop the lift smoothly if any obstruction is detected.

Light Curtain

All our Home Lifts are installed with a light curtain which ensures that the lift stops smoothly if it detects anything crossing in or out of the lift while moving.

Weight Sensors

All Home Lifts are installed with weight sensors that will not allow them to travel if weight capacity is exceeded.

Balance Sensors

Various safety sensors will prevent the Home Lift from travelling if it is out of balance for whatever reason.

Alert Panel

All possible faults or safety concerns are communicated through a user-friendly light panel inside the lift which allows for easy diagnosis and rectification.

Obstruction & Non-slip

The bottom safety sensor will ensure that the lift will stop smoothly if it detects any obstruction. A further safety feature is the non-slip floor of the lift.

Next level living

Lifta Home Lifts are the epitome of style, function and comfort
- the perfect addition to your double storey home.

BARRIER FREE LIVING

Lifta Home Lifts are stylish domestic lifts that can be installed almost anywhere in your home. Our shaftless, plug and play installations are simple, neat and can be fitted with minimal alterations to your new or existing home. There is no need for three phase power or extensive and costly construction work and our units can be installed within 2 days.

Take your home to the next level today.

Contact Lifta for a **free on site assessment on 0807 37 37 37.**
